SPRING and FALL

1929

HUGH B. BARCLAY
GROWER
NARBERTH, PA.
**HERBACEOUS PERENNIALS**

*Achillea ageratum—Sweet Maudlin* .............. $15.00 per 100
  One foot. Flowers yellow with long season of bloom. Foliage bright green, attractive both summer and winter. Good border plant. Perfectly hardy.

*Agrostemma coronaria—See Lychnis.*

*Alyssum argenteum—Silver Alyssum* ............ 15.00 per 100
  One foot. Flowers yellow, later than A. saxatile. Foliage, narrow, small, silvery.

*Alyssum rostratum—Yellowhead Alyssum* ..... 15.00 per 100

*Anchusa barrelieri—Early Bugloss* ............ 15.00 per 100
  About 2 ft., much lower than A. italica and more attractive in flower—a darker blue.

*Aquilegia—Columbine. Mrs. Scott Elliott’s Strain* A selection of long spurred hybrids of fine colors.

*Aquilegia—Columbine. Farquhar's Pink* ....... 15.00 per 100

*Asclepias tuberosa—Butterflyweed; 2-yr., strong* 15.00 per 100
  A beautiful orange-flowered, permanent perennial, about 18 in. high.

*Centaurea montana—Mountain-bluet* ............ 15.00 per 100
  About one foot. Flowers large, blue, quite continuous during the growing season. Good for massing.

*Chrysanthemum articum—Artic C* ............... 15.00 per 100
  About 15 in. Flowers daisy like in the autumn. Foliage small, forming dark green attractive mats.

*Chrysanthemum—Hartje & Elder Daisy.* Fine plants An early large daisy of excellent garden habit.
  A neater plant and a better cut flower than the usual shasta daisy.

*Chrysanthemum maximum—Etoile de Anvers, Mrs. Tersteeg, and Triumph. 2-year seedlings* 10.00 per 100
  These are all fine daisies of the Shasta type.

*Chrysanthemum coccineum (Pyrethrum)—Painted Lady* ................. 15.00 per 100
  Seedlings of James Kelway. Large flowered, bright vermilion.

*Corydalis cheilanthifolia—Chinese Corydalis* .... 30.00 per 100
  A half to one foot. A rare plant with fernlike foliage and numerous yellow flowers.

*Delphinium belladonna. Early sown, 1-year* ...... 6.00 per 100
  These plants should bloom finely this year.

*Delphinium hybridum. 1-year transplants* ...... 15.00 per 100
  From the finest strains of seed.

*Dianthus barbatus—Sweet William. Fine transplants* A strain with over fifty old-fashioned, calico colors. A fine mixture for bedding.

*Dianthus cruentus—Blood-pink.* Strong plants ... 12.00 per 100

*Dianthus deltoides—Maiden Pink* ............... 15.00 per 100
  Stock of best planting size from seed of named varieties. The plants will vary in foliage and
flower color and be more interesting than plants from division of one variety. The foliage is evergreen and the plants form an even mat of foliage a few inches high.

Dianthus latifolius—Double Cluster Pink

Good colors, mostly garnet. A fine border plant less than one foot high and quite continuously in flower. Intermediate between D. chinensis and D. barbatus in appearance and possibly a hybrid.

Dianthus plumarius varieties—Garden or Grass Pinks

The plants offered are propagations from a number of very fine flowering plants.

Digitalis gloxiniaeeflora “Shirley.” Strong transplants Produced by the originator of “Shirley” poppies. A very vigorous strain. A distinct improvement.

Eryngium planum—Seaholly

All the seahollies have heads of flowers suitable for winter bouquets. The firm flower heads and the bracts and stem leaves are colored some shade of blue, giving the plants a very distinct appearance. Stems, bracts and flower heads in this species blue. Height about 3 ft.

Eryngium coeruleum—Seaholly

About 3 ft. with smaller and more numerous flower heads than E. planum, and another shade of blue.

Euphorbia myrsinites

A plant of old gardens, very distinct, and suitable for rockeries.

Gaillardia grandiflora—Gaillardia. “Huntington’s Selected” Seedlings from flowers not the usual red and yellow. Some almost white, others straw yellow with deep rose zone.

Gaillardia grandiflora

A large red and yellow flowered type.

Linaria dalmatica—Dalmatian Toadflax

About 3 ft., forming large clumps. Foliage glaucous, very attractive and distinct. Flowers lemon yellow on long graceful spikes. Best as specimen plants.

Lychnis coronaria (Agrostemma)—Rose Campion

The bright rose flowers and the whitish foliage make this a conspicuous plant. About 2 ft.

Lychnis haageana—Haage Campion

About 15 inches. Flowers large, nearly 2 in. across, in shades of red, quite continuously all summer. A shadowy plant for massing.

Oenothera fruticosa youngii—Young’s Sundrops

Salvia argentea—Silver Sage

Large, white, very silky, leaves lying rather close to the ground. Very distinct. Flowers not showy and flower stems had best be removed to preserve strength of plant.
Salvia turkestana rubra .......................... 15.00 per 100
A sage with rather large, irregular, Gloxinia-like leaves lying flat on the ground and branched flower stems about two feet high. The flowers proper are quite small but are subtended by large colored bracts which are showy and remain brightly colored for a long period during mid-summer. The bracts in this variety are white with markings of purplish-red.

Salvia turkestana variety from Vatican Garden ... 25.00 per 100
Has not yet flowered here. Strong one-year plants.

Stachys lanata—Wooly Betony ..................... 12.00 per 100
Less than 6 inches, spreading. Foliage silvery white like Dusty Miller, but with the soft texture of the Mullen. Flowers inconspicuous. A valuable, perfectly hardy, plant for low masses in sun or half shade.

Statice armeria (Armeria)—Thrift .................. 15.00 per 100
Tunica saxifraga—Saxifrage Tunicflower ........... 15.00 per 100
Veronica longiflora—Beach Speedwell ............. 15.00 per 100
Veronica spicata—Spike Speedwell ................ 15.00 per 100
Viola cornuta—Tufted Pansy ....................... 12.00 per 100
Admiration—Dark Blue.
Kelway’s Show—Mixed colors.
Scotch Border—Mixed colors.

WOODY PLANTS

*Berberis sargentiana—Sargent Barberry. 12-15 in. Bushy .......................... 1.00 each
Plants balled and burlapped. A hardy evergreen Barberry reaching 4 ft. in height. A compact grower.

*Juniperus communis montana (depressa)—Mountain Juniper. This low growing, rather prostrate Juniper varies much in habit of growth, making each individual plant the more interesting. Plants selected for their beautiful styles of growth. Prices balled and burlapped from clay soil, insuring a good ball.

Ligustrum ovalifolium—Californian Privet ........ 12.00 per 100
Ten branches and up. Over 3 ft. Finer plants could hardly be grown. Fine for training as specimens.

Ligustrum regelianum—Regel’s Privet ............. .75 each
Specimens 2 ft. high and 3 ft. across.

Syringa persica rubra—Red Persian Lilac .......... 1.00 each
Specimen bushy plants, 4 ft.
(Note: Single plants not less than 25¢, or as quoted. Ten at the 100 rate.)

Plants marked * cannot be shipped with soil outside Japanese Beetle Zone.
